

Full Power - Intensive 2-Days-Training Course in Civil Aviation Knowledge for Non-Aviation-Background Participants

Dear Plattform Colleagues,

As a psychologist who has spent most of his working life in aviation I know how complex that subject is in facts, processes and terminology. Thus it took me a considerable time and permanent and continuous efforts - many of them not immediately leading to a structured understanding - to grasp that complex industry.

Out of this experience the concept has risen to pave the way for consultants, expert staff, managers and other aviation interested parties without much prior aviation experience by implementing a concise, structured basic training which helps from scratch to understand and make use of the "insider" terminology of aviation in a short, but comprehensive trainings course.

Should you be interested in that training course contact me for possible further enquiries or for a registration to save a participant's space. Contacts above.

Thank you, hopefully see in Hamburg and kind collegial regards

Rainer Brorsen
